

## Gym Website Pitch Reference

This document is a **short pitching reference** for proposing a professional website to a local gym owner.

A gym website can act as a **24/7 digital front desk**, helping showcase:

- Timings
- Membership plans
- Trainer details
- Location
- Contact options
- Enquiry flow

—all in one place.

---

### Why a Gym Should Have a Website

- **Builds Professional Image:** Makes the gym look more **trustworthy and credible** to new visitors.
- **Central Information Hub:** Members can check **timings, plans, offers, trainers, and facilities** in one place.
- **Reduces Repeated Queries:** Saves time by answering common questions upfront (no need for repeated WhatsApp or calls).
- **Increases Enquiries:** Features like **WhatsApp button, call button, Google Maps, and enquiry forms** convert interest into leads.
- **Improves Online Visibility:** Helps people discover and compare gyms online before visiting.

---

### What the Website Can Include

A practical first version should be **simple and conversion-focused**:

-  Home page with strong introduction + call to action
-  Membership plans / pricing section
-  Timings, address, and Google Maps integration
-  Trainer / facilities section
-  Photo gallery (gym space & equipment)
-  WhatsApp contact + direct call button
-  Basic enquiry / free-trial form

---

### How to Explain the Value (Pitching)

Focus on **business benefits**, not technical details.

#### **Suggested Pitch Line:**

A simple gym website will help new people understand your gym before they visit. They can see your timings, plans, trainers, equipment, and location in one place, and contact you directly on WhatsApp or call. It saves your time and gives a stronger first impression.

---

### Suggested Pricing

For a student developer, a fair entry-level pricing can be:

| Package  | What is Included                                                              | Suggested Price |
|----------|-------------------------------------------------------------------------------|-----------------|
| Basic    | One-page site, timings, plans, gallery, contact, WhatsApp button, Google Maps | ₹2,500 – ₹3,500 |
| Standard | 2–4 pages, enquiry form, better design, 1–2 revisions                         | ₹4,000 – ₹6,000 |

| Package                   | What is Included           | Suggested Price      |
|---------------------------|----------------------------|----------------------|
| Maintenance<br>(Optional) | Minor updates after launch | ₹300 –<br>₹800/month |

### Domain & Hosting Cost

A simple static website can be hosted for **free initially**.

| Item                  | Estimated Cost         |
|-----------------------|------------------------|
| Hosting (Static Site) | ₹0 (Netlify Free Plan) |
| .in Domain            | ~₹899/year             |
| .com Domain           | ~₹1,400/year           |
| SSL Certificate       | Free (included)        |

### How to Present the Commercial Offer

Keep it **simple and clear**:

- Website Development: **₹3,000 – ₹5,000**
- Domain: Paid yearly by client
- Hosting: **Free initially** (for static site)

**Suggested Line:**

I can build a professional mobile-friendly website for your gym for around ₹3,000 to ₹5,000 depending on the sections you want. For going live, you only need a domain, which costs around ₹900 to ₹1,400 per year. Hosting can be managed at no extra cost initially.

### Recommended First Version

For your first client project, keep it **simple and practical**:

-  One strong homepage
-  Membership plans
-  Timings & location
-  Photo gallery
-  WhatsApp contact
-  Trial / enquiry form
-  Custom domain (after approval)

### Final Pitch Idea

Your gym already has the service and the audience. The website will simply present it better online, help more people trust the gym, and make it easier for new members to contact you quickly.

**Real gym websites (you can actually join from these)**

#### 1. Gold's Gym India

 Website: <https://goldsgym.in/>

- One of the **biggest gym chains in India (150+ centers)**
- You can:
  - Find gyms near you (including Pune)
  - Book a **free trial**
  - Check programs (Zumba, yoga, personal training)
- Has proper membership system + physical branches

👉 This is exactly the type of “real gym website” you’re talking about.

---

## 2. Anytime Fitness India

🌐 Website: <https://www.anytimefitness.co.in/>

- Known for **24/7 open gyms**
  - You can:
    - Take virtual tours of gyms
    - Apply for membership
    - Locate nearby branches
  - Popular with working people because of flexible timings
- 

## 3. cult.fit

🌐 Website: <https://www.cult.fit/>

- Modern fitness platform + physical gyms
  - You can:
    - Buy a **Cult Pass** (access multiple gyms)
    - Book classes and workouts
  - Very popular in India due to **affordable memberships & wide network**
- 

## 4. Snap Fitness India

🌐 Website: <https://www.snapfitnessindia.com/>

- International gym chain with branches in India
- You can:
  - Explore gym locations
  - Check facilities and membership
- Known for compact, well-equipped gyms
